

UNPARALLELED PERFORMANCE

CABLES & ACCESSORIES

Easily install, configure, and connect your Celadon probe cards to your prober and testing system with Celadon's versatile cables, adapter plates, and cable organizers.

Cables and cable harnesses are designed to minimize triboelectric effect, leakage, and noise during testing. Cable clamps, magnetic clips, and pass-through organizers help keep your test area tidy.

Other accessories, like light tight enclosures, wafer level reliability tester interfaces, and multi-site adapters can help your test floor function efficiently and run tests effectively.
